Reasons for Allowance/Examiner's Amendment

In view of applicant's recent remarks, none of the prior art of record teaches the combined features of the cryptoprocessor having: an arithmetic unit for processing operands; a register memory for storing operands; and a register memory configuration unit designed to configure the register memory such that memory space in the register memory is assigned to operands and that memory space in the register memory that is not assigned to operands is made available for data other than the operands, the volatile working memory comprising: the external working memory being physically disposed outside the cryptoprocessor, the register memory space, being physically disposed within the cryptoprocessor, not assigned to operands, the part of the register memory space not assigned to operands mapped into the working memory, the address unit operable to address the register memory space not assigned to operands and being physically disposed within the cryptoprocessor in the same way as the external working memory being physically disposed outside the cryptoprocessor (claim 1).

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with L. Brutman on 06/26/08.

In the claims :

Canceled claims 4, 9-16.
